

The Finest Sound

1963

Why Premier?

CATALOGUE 63*

Premier

**THE FIRST
NAME IN
DRUMS**

Premier have devoted 40 years to manufacturing percussion equipment.

Premier are unique in making virtually everything in their own factories.

The elimination of sub-contracting means that Premier can offer you far higher quality for the same price.

Premier drums have the highest re-sale value, proof of their expert construction and durability.

Premier have a complete research and design department.

Almost every advance in drum design during the last 15 years has come from this department.

Here are some examples, the majority still *exclusive to Premier*.

FIRST with flush base stands.

FIRST with floating snares.

FIRST with flush-bracing, the perfect tension system.

FIRST with die-moulded hoops in every size.

FIRST with patented height adjustment.

FIRST with single lever bass drum rods.

FIRST with single lever thumb screws.

FIRST to chromium plate all their equipment.

FIRST with tilt action for Hi-hat.

FIRST with a complete and comprehensive spare parts service in 96 countries.

The Premier sound—praised and preferred by drummers the world over!

The HI-FI

Another Premier snare drum with exclusive features. The 'Hi-fi' embodies one-piece die-moulded hoops and Flush-braced brackets which ensure the smoothest most *even* tension possible. The one-piece hoops *have no join*, cannot bend or buckle.

A conventional snare strainer with fast, silent throw-off permits the concert artist to use gut snares if desired.

Wood or metal shells; choice of two sizes; in all the beautiful, indestructible Premier finishes with metal parts in superb 'Diamond' chrome.

Hi-Fi

Wood-shell. See page 6 for finishes.

31. 14"×5½" (35×14 cm)

32. 14"×6½" (35×16.5 cm)

Metal-shell. Chrome plated.

37. 14"×5½" (35×14 cm)

38. 14"×6½" (35×16.5 cm)

Gut snares to order at no extra.

Fitted Everplay-Extra heads.

The CONNOISSEUR

Although designed for symphonic and concert work, the 'Connoisseur' offers all fastidious drummers the ultimate in sensitive response. It is fitted with fine gut snares as standard and each snare strand can be tensioned *individually*.

Other features are: Parallel snare action. Trigger-fast throw-off and extra tension brackets. Metal-shell finished in Premier's 'Diamond' chrome.

Connoisseur

Metal-shell only.

7. 14"×5½" (35×14 cm)

8. 14"×6½" (35×16.5 cm)

Fitted Everplay-Extra heads.

Wire snares to order.

RESPONSE

THE ROYAL-ACE 4" MODEL

WOOD OR METAL SHELL AND FLOATING SNARES

A light-weight drum, just 4" deep, designed primarily for the drummer working with small combos and modern jazz groups. Sharp response and overall clarity enable fast, staccato rhythmic patterns to cut through better with less effort.

The patented Premier floating snare system, described below, brings drum tone to a new high level. The parallel snare action keeps the 20-strand snares (made up in two independent sets of ten) always under tension. Unwanted snare 'buzz' is completely eliminated. The trigger-fast throw-off switches the snares on or off instantly and positively.

Wood-shell 10. 14" x 4" (35 x 10 cm)

For finishes see page 6.

Metal-shell 11. 14" x 4" (35 x 10 cm)

Chrome plated.

All metal parts finished in Premier's incomparable 'Diamond' chrome.

Fitted Everplay-Extra heads.

PREMIER FLOATING SNARES

Revolutionary design frees shell from deadening effect of snare attachments.

No longer are the snares attached to both sides of the shell, choking the sound and stifling the vibrations. Snares and shell are completely free to give you the most wonderful drum tone, fantastic response and a drum so easy to play on.

Nylon bearings—cannot wear, no oiling needed.

Snare bar supports both snare holders and is completely free from the shell.

Snare holders are not screwed to shell.

Exclusive Premier "Beam".

Trigger-fast throw-off.

Snares remain at full tension when thrown off.

THE ROYAL-ACE

WOOD OR METAL SHELL AND FLOATING SNARES

TECHNICAL DETAILS

The Royal-Ace has these great features:

FLOATING SNARES.

Parallel snare action.

14" of fuller snare response.

20-strand snares (in two sets of ten).

Flush-bracing.

One-piece hoops—no join—cannot bend, buckle or warp.

Machine cut threads, dust-proof, rust-proof.

Slotted bolts, tightened by a coin if key mislaid.

Internal tone control—two-pad.

Everplay-Extra heads.

Here is one of the latest results of Premier's constant search for the perfect snare drum. Outwardly, the difference between the Royal-Ace and its predecessor is the trigger-fast throw-off, swift and positive in its action. But fundamentally the improvements are complete and vital. The snares cannot muffle the shell's resonance by being rigidly attached both sides. Eliminated is the loss of snare response through contact with the shell at both ends. The fast, parallel snare action switches off the snares at both ends simultaneously, keeping them always at perfect tension.

Premier's patented floating snares and independent shell give you everything you've looked for and longed for, a parallel action which *cannot* go out of alignment.

THE ROYAL-ACE

with floating snares (world-wide patents pending). In many finishes (see page 6).

BASS DRUMS

7 Exclusive Features

- ★ **Flush Bracing**
Sleeker, stronger, self-aligning—the one system for perfect tensioning without straining the shell.
- ★ **Single-Lever Handles**
Quicker to turn, stronger, easier for packing.
- ★ **Two Tone Controls**
Internal controls included in the price.
- ★ **Finer Finishes**
Thicker material gives greater depth of pearl and larger, more brilliant sparkles. The material is butt-joined.
- ★ **Premier 'Diamond' Chromium**
Unequaled, hand-finished chromium plating at no extra charge.
- ★ **Everplay-Extra Heads**
The finest, long-lasting plastic heads. Unaffected by temperature change, give true sound all the time.
- ★ **Built-in Spurs**
All Premier bass drums except 26" and 28" supplied complete with the latest Disappearing Spurs, fully described below.

Examine a Premier bass drum and no other will ever satisfy you. At every point it bears the hallmark of superior class. Look inside; compare it with the inside of any other drum and see for yourself the big difference in quality.

Premier COVERS

These are our own covers made in our own factories from the most suitable material. Completely waterproof and with either Zip fastener or Premier quick-action press studs. By adding years to the life of your instruments, Premier cases and covers will prove a fine investment. Look for the "P"!

FOM SNARE DRUM

Made to fit the drum comfortably and to give full protection against damp. The sizes are *shell* measurements: overall depth is 1½" more.

No.	Shell Size	No.	Shell Size
400	14" × 4"	407	14" × 8"
404	14" × 5½"	402	14" × 12"
405	14" × 6½"		

Also with Zip Fastener at small extra cost. Add Z to above numbers.

FOM TOM-TOM

With Studs No.	Tom-tom Size	With Zip No.
409	10" dia.	409Z
410	12" dia.	410Z
407	14" × 8"	407Z
408	14" × 14"	408Z
412	16" × 16"	412Z
413	16" × 20"	413Z

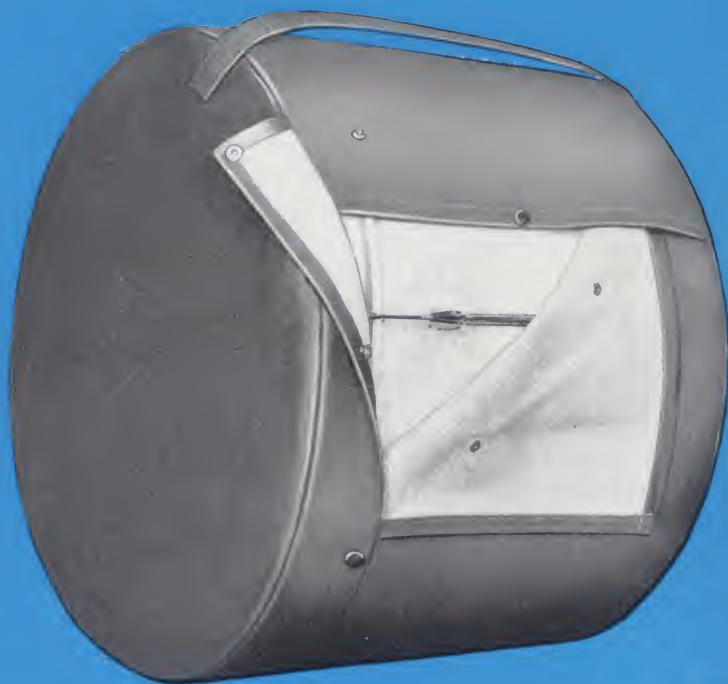

THE PERFECT DRUM CASE

Made of the toughest fibre, heavily reinforced with heavy protective corners. Size 22" × 18" × 9½". Special compartment protects the snare drum. Will hold:—

Snare Drum	Drum Stand
Cymbal Stands	Hi-hat
Cymbal Holders	Pedal
Sticks	Brushes
Stool	Cowbell
Woodblock	etc., etc.
Cymbals up to 18"	

452

FOM BASS DRUM

No.	Overall Width	Shell Size
423	20" × 15"	20" × 12"
424	20" × 17"	20" × 14"
426	22" × 15"	22" × 12"
427	22" × 17"	22" × 14"
415	24" × 15"	24" × 12"
414	24" × 17"	24" × 14"
416	26" × 15"	26" × 12"
419	28" × 15"	28" × 12"
420	28" × 17"	28" × 14"

Look for the "P" on the studs—the sign of a perfect cover.

ZIP FASTENER

Premier's De Luxe Covers have the finest quality Lightning Zip Fastener with safety catch. Well worth the very modest extra cost.

When ordering, add Z to above numbers.

FIBRE CASES

Telescopic lid. Will take any depth.
778 20" diameter 779 22" diameter

FIBRE CASES

FOM TOM-TOM

VIBRAPHONES — The '750'

Wide Bass Bars—Powerful New Motor with Mechanical Speed Control

You'll have a wonderful new experience when you play the fabulous "750"—an experience made possible by modern science. New processes combined with electronic tuning-by-sight bring you an instrument of incomparable performance. Careful graduation of each bar ensures perfect intonation over the entire range and rich, swelling vibraphone sounds that reach new tonal dimensions. Bars are 2" to 1½" wide by ½". Beauty of line matches the 750's sound for Premier's designers have once again created an instrument of impeccable styling—fit for the grandest concert hall. Total reliability is another feature of the "750". Nothing to wear out, nothing to go wrong; no loose parts to be lost. Silent, brushless motor, AC 220/240 volts, 50 cycles; to order AC 110, 50 or 60 cycles. For using 110 volt motor on 200/250 volts, Transformer 743 can be built in.

750 Vibraphone, 3 octaves F to F, with beaters.

739 Pair of cases.

743 Transformer.

Busy vibe players will welcome this latest addition to the Premier range. Can be dismantled or erected in a matter of minutes! Large 1½" x ½" bars. Weighs only 81 lbs.

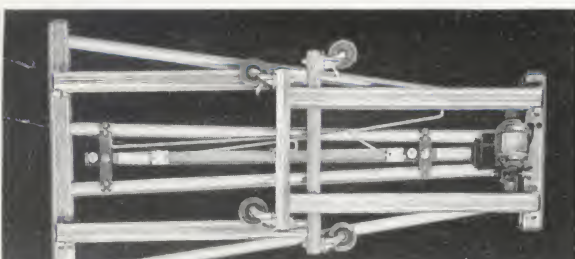

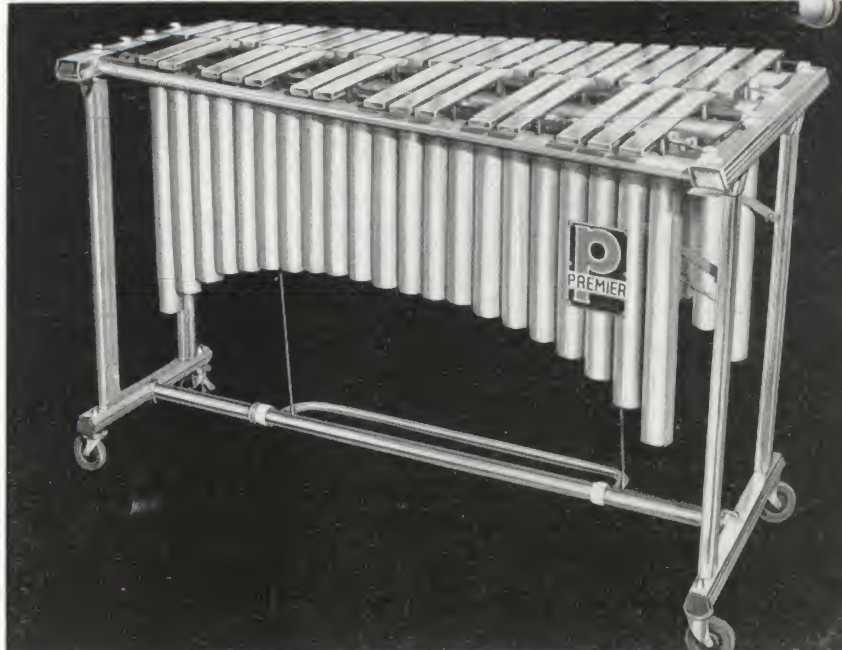

The '701' is a professional instrument of the highest standard of tone, quality and eye-appeal. A joy to play and listen to. Faultlessly tuned by the very latest tuning-by-sight technique and in Premier's incomparable style and finish. Tuned A440, any other pitch to order.

New 701 Vibraphone, 3 octaves F to F, with beaters.

736 Fibre Case and Satchel.

736A Satchel only, for bars.

NEW—THE '701'—FOLDING

XYLOPHONES and MARIMBAS

Built for the world's finest players, Premier Xylophones and Marimbas set a new standard of quality. Tone, appearance and portability make them ideal for concert, stage and studio artists. The new stands are rigid, smart and easy to set up. The bars are of hard, matured Honduras rosewood; visual tuning is dead accurate; the finishes are impeccable.

The difference between Xylophones and Marimbas

The Premier marimba is built one octave lower than the xylophone.

In order to produce the beautiful, sonorous tones which are the feature of Premier marimbas, the bars are much thinner than on a xylophone. They are made for use with soft, or half-hard beaters and must not be played with hard beaters.

'500" XYLOPHONE

The most heard xylophone on radio and TV and at concerts.

Pitched one octave higher than the '600' Marimba. Brilliant, resonant tone. Quick to set up and pack.

Hard, durable Honduras rosewood bars, 1½" wide by 7" thick. Raised accidentals. Split frames and resonators. Ends in one piece. Resonators and tubes of polished alloy. Other metal parts in 'Diamond' chrome. Length 72", width 32", height 33" (182 cm x 82 cm x 84 cm). Two pairs of beaters included.

500 Premier Xylophone, 4 octaves, C to C.

738 Cases—pair fitted inside with quick safety straps.

'600" MARIMBA

Bars graduate from 2½" to 1½" wide by 7" thick with the accidentals positioned for fast playing. All-rubber note pegs. Spring suspension. Oversize resonators give fuller tone to lower notes. Split frames and resonators. Ends, including wheels, in one piece. Brakes fitted. New-type bolts cannot be lost. Polished, lightweight alloy resonators, the front set beautifully arched. Other tubes of light, polished alloy with chromium-plated steel supports. Length 72", width 38", height 33". Two pairs beaters free. Tuned A=440 or to order.

600 Premier Marimba, 4 octaves, C to C.

737 Cases—pair fitted inside with quick safety straps.

CHIMES—NEW MODEL

We present brand-new Chimes made of a new alloy, 1½" diameter, scientifically designed to retain the characteristic bell type overtones without allowing them to predominate. We believe the new diameter in this wonderful metal will make these the world's most acceptable Chimes, for in whatever key they are played they will sound like a really beautiful peal of bells.

Here are some other features: Tuning by sight. Chimes hung centrally for fast playing. Heavy striking cap. New bar damper, fast, positive. Brakes on two wheels. Very simple to erect and pack. No bolts which can be lost. Finished in Premier's 'Diamond' chrome. Mallet included.

861 18—1½", C to F.

860 18—1½", C to F. (to order)

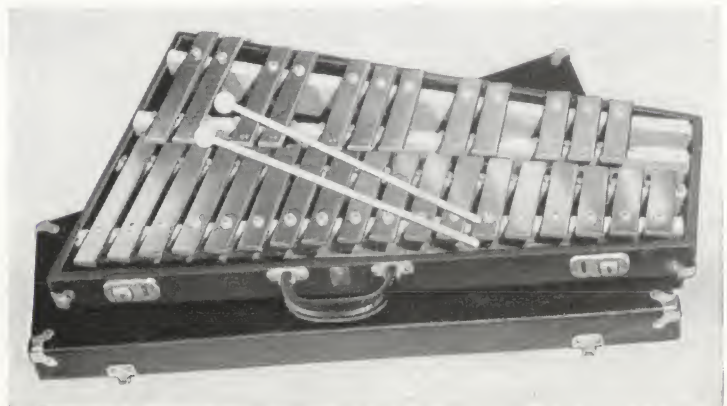

Chimes supplied without stand, if required.

GLOCKENSPIEL (Orchestra Bells)

A glockenspiel with the correct clear, sharp, penetrating tone. Newly designed for better tone and for faster playing. Bars are fully insulated and cannot become detached from frame or jump up.

Steel bars 1" x 1", chromium plated. Case only 26" (66 cm) long by 16½" (42 cm) maximum width. Detachable lid. Sold complete with beaters.

570 2½ octaves, G to C.

HAND-TUNED TYMPANI

The fastest hand-tuning Tympani made. With floating head hoops, self-aligning fittings and hand-cut threads, the new handles can be turned faster than was ever possible before.

Full-depth bowls for symphonic tone. Premier's new, sturdy leg assembly protects the shell against damage at a very vulnerable point and enables each leg to slide gently into the shell for packing. All legs are fitted with a neat rubber foot. Sticks included.

SIZES

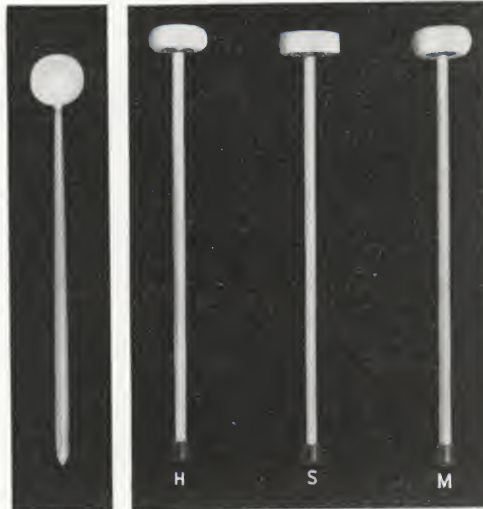

- 226 Pair, 25" and 28" (64 and 71 cm)
228 22½" (57 cm)
